

KEYKEG

Non-Food

EASY • SAFE • SUSTAINABLE

Closed-system packaging, ready to use for dispensing and dosing almost all non food liquids safely and easily.

Convenient

Lightweight, standalone, closed-system that eliminates cleaning routines and aggressive detergents. Dispense almost to the last drop; product residue remains in the inner bag for easy disposal. 10 L, 20 L and 30 L capacity available.

1

Filling

KeyKeg's Bag-in-Keg™ Technology prevents the liquid from coming into contact with dispensing gas. This results in superior retention of quality and freshness.

2

Dispensing

As the KeyKeg is put under pressure by the dispensing gas, the bag compressor and the liquid is expelled from the KeyKeg.

3

Empty Keg

When the bag is empty, the liquid ceases to flow. The design of the bag enables dispensing until almost the last drop.

KEYKEG

Non-Food

Versatile

Suitable for dispensing and dosing almost all liquids, including personal care products, adhesives, detergents, pesticides, paints and coatings.

Put safety first

Protect your vulnerable liquids against physical, biological, mechanical and chemical damage with strong, damage-resistant Double Wall™ Technology. Fill, transport, store and dispense in safety using the SBS (Strength-by-Separation) principle.

No loss of quality

Maximise your product shelf life with Bag-in-Keg™ Technology, a laminated, leakproof, airtight inner barrier against gasses, humidity and UV light. Dispense almost to the last drop using any gas, even compressed air.

Stability, Stackability and Handling

Move, transport and store your liquids effortlessly with the lightweight, grip ring and basecup. Designed to stack easily, optimize floor space and load safely onto pallets.

Sustainability

Designed for circularity, KeyKeg is compliant with ISO 18604. Empty KeyKegs can be recycled into the actual raw materials used to produce new KeyKegs. 86% of every empty KeyKeg is suitable for recycling and on average each new KeyKeg consists of about 50% circular material. No raw material downgrading or downcycling.

Personalised Sleeves

KeyKeg is available with personalised sleeves that complement your branding strategy. Increase awareness about your brands, while also providing information about handling and safety.
